### Micro 27 w/ Gel Wrist Rest

\$74.08

The Micro 27 Keyboard Platform is one of our most popular platforms. It features a 27 inch wide surface for extended comfort and usability. The wide surface allows mousing to be done directly on main surface. Mousing can be performed on both the right and left sides alike - for right and left handed users, or users that like to switch between hands.

The Micro 27 keyboard platform also features a gel wrist support for maximum comfort and non-skid pads to prevent the keyboard from slipping and moving around.

**The Micro 27 does not require the use of an auxiliary mouse disk or platform.**
